

Top Tips for Mini-beast Hunting

1. Treat your bugs with care; remember they are fragile and to always put them back where you found them.
2. Roll logs and stones gently to reveal mini-beasts. Remember to always replace any logs or stones moved.
3. Give a branch a firm shake over a white sheet and watch the mini-beasts drop.
4. Explore grassland and meadow using a sweep net. Sweep the net from side to side as you walk.
5. Use a wide mesh garden sieve. Put a handful of leaf litter into a sieve and shake it carefully over a white sheet.
6. Use your paintbrush to gently encourage the mini-beast into your pot.

Can you make a rule for looking after mini-beasts?
